🌐 linkedin.com/in/shehryar-liaqat

Full Stack Developer specializing in designing and building scalable, production-ready web applications. Experienced in backend development with Python and FastAPI, including RESTful API design, PostgreSQL data modeling, Redis caching, and Kafka-based event processing, alongside containerized deployment with Docker on AWS. Builds responsive, user-friendly frontends with React.js and Tailwind CSS. Strong grounding in clean architecture, database design, and performance optimization, with a focus on delivering reliable software that scales.

Work Experience

Full Stack Developer, *Devstrix*

02/2026 – Present
Islamabad

- Develop and maintain scalable full-stack web applications using Python (FastAPI), React.js, PostgreSQL, Redis, and Docker.
- Design and integrate RESTful APIs, ensuring secure, efficient, and reliable communication between frontend and backend systems.
- Collaborate with cross-functional teams to implement new features, optimize application performance, and resolve production issues.
- Build responsive, modern user interfaces with React.js and Tailwind CSS, following best practices for usability and maintainability.

Backend Developer (Internship), *CitrusBits*

07/2025 – 08/2025
Islamabad

- Completed an intensive six-week backend development program focused on scalable server-side architecture.
- Built backend services using Node.js and NestJS, applying modular and scalable design patterns.
- Worked with MongoDB and PostgreSQL, implementing queries and applying performance optimizations.
- Used TypeORM for efficient database interactions and schema management.

Frontend Developer (Internship), *TechInsects*

06/2024 – 08/2024
Rawalpindi

- Developed responsive, user-friendly web interfaces using React.js, Ant Design, Material UI, and Tailwind CSS.
- Implemented state management, component architecture, and reusable UI patterns for scalable frontend applications.
- Optimized performance, accessibility, and cross-browser compatibility for a seamless user experience.

Education

Bachelor of Science in Computer Science,
KICSIT (Institute of Space Technology)
CGPA: 3.54 / 4.0

02/2022 – 02/2026
Kahuta

Technical Skills

Languages

Python, JavaScript, TypeScript, SQL

Backend

FastAPI, Node.js, NestJS, RESTful API Design,
TypeORM

Frontend

React.js, Tailwind CSS, Ant Design, Material UI

Databases

PostgreSQL, MongoDB, Redis

Cloud & DevOps

AWS, Docker, Apache Kafka

AI / ML

TensorFlow, PyTorch, OpenAI / LLM APIs

Tools & Practices

Swagger / OpenAPI, Git, Clean Architecture,
Database Design, Performance Optimization

Languages

English

Professional

Urdu

Native

Projects

WedX — Event Management Platform, *FastAPI, React, PostgreSQL, Redis, Kafka, Docker, AWS*

- Built a full-stack event management platform featuring RSVP management, a vendor marketplace, and community features.
- Developed scalable APIs with Redis caching and Kafka-based event processing for high-throughput workloads.
- Designed the database architecture and integrated real-time notifications.
- Implemented role-based authentication and cloud deployment workflows on AWS.

AI-Powered Healthcare Diagnosis System,

Python, FastAPI, React, Tailwind, PostgreSQL, Docker, AWS, TensorFlow/PyTorch

- Developed an AI-powered web platform for medical image analysis and disease detection.
- Built REST APIs for image processing, prediction, and automated report generation.
- Integrated deep learning models and deployed scalable services using Docker and AWS.
- Implemented user authentication, role management, and analytics dashboards.

Intelligent Customer Support System, *FastAPI, React, OpenAI/LLM APIs, PostgreSQL, Redis*

- Developed an AI-powered customer support platform with real-time chat capabilities.
- Built backend services for conversation management and knowledge retrieval.
- Integrated LLM-based responses and automated support workflows.
- Implemented analytics dashboards to track customer interactions and system performance.
